

PLATINUM ANTIFREEZE

Platinum antifreeze is a heavy duty antifreeze/coolant that contains a proprietary poly-organic/multi-organic acid technology inhibitor system that does not contain any phosphate, silicate, borate, nitrate or nitrite. It provides superior corrosion protection and total cooling system protection for 600,000 on road miles without the use of any additive containing coolant filters or supplemental coolant additives (SCA's). The addition of an extender at 300,000 miles is the only maintenance required, although it is recommended that a sample be tested quarterly to detect any problems. Platinum antifreeze has low reactivity which makes it less sensitive to contaminants such as motor oil, hard water compounds and other coolants. It can be mixed with other coolants in any proportion without adverse effects on corrosion protection.

SPECIFIC GRAVITY	1.11 - 1.145
PH, 50% V/V	7.5 - 9.0
TOTAL WATER, %	2.8
FREEZE POINT, 50% V/V °C	-36
FLASH POINT, UNDILUTED °C	162
FLASH POINT, 50% V/V °C	107
COLOUR	CLEAR

APPLICATIONS

MEETS OR EXCEEDS THE FOLLOWING SPECIFICATIONS

- AUTOMOTIVE/LIGHT DUTY VEHICLES
- HEAVY-DUTY DIESEL/LOW SILICATE
- TMC OF ATA RP 329/330*

THE MAINTENANCE COUNCIL OF THE AMERICAN TRUCKING ASSOCIATION.
ALSO MEETS THE NON-PHOSPHATE REQUIREMENTS OF EUROPEAN OEM'S AND NON-SILICATE REQUIREMENTS OF JAPANESE OEM'S
