

R.V. ANTIFREEZE

BOSS R.V Antifreeze is a specially-formulated RV antifreeze the contains propylene glycol and food grade phosphate. All ingredients are classified as GRAS (generally recognized as safe) by the FDA. Additionally, this product's additive system has passed corrosion requirements as specified in ASTM D1384 and provides outstanding corrosion protection for copper, brass, solder, steel, cast iron and aluminum. It is also compatible with most plastics, elastomer and types of rubber. This RV antifreeze is primarily used to winterize all types of portable water systems including; boats, trailers, recreational vehicles, vacation homes and swimming pool/spa filtration and heating systems. With an operating temperature range of -50°F to 150°F, when diluted with water will provide freeze protection to below -60°F and burst protection, depending on dilution can be as low as -100°F. This RV antifreeze is not designed for long-term protection or for use on operating engines.
