Section 6: ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Environmental precautions: Methods and material for containment and cleaning up: Reference to other sections:

Not required. Do not allow to enter sewers/ surface or ground water. Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose contaminated material as waste according to item 13. See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

Section 7: HANDLING AND STORAGE

<u>Handling</u>	
Precautions for safe handling:	No special precautions are necessary if used correctly.
Information about protection	
against explosions and fires:	No special measures required.
Conditions for safe storage, includ	ing any incompatibilities · Storage
Requirements to be met by	
storerooms and receptacles:	No special requirements.
Information about storage in	
one common storage facility:	Not required.
Further information about	
storage conditions:	None.
Specific end use(s):	No further relevant information available.

Section 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

Additional information about des	gn of technical systems: No further data; see item 7.		
Control parameters			
Components with limit values tha	t require monitoring at the workplace:		
122-39-4 diphenylamine (0.1-2.5%): EL Long-term value: 10 mg/m ³			
	EV Long-term value: 10 mg/m ³		
Additional information:	The lists that were valid during the creation were used as basis.		
Exposure controls			
Personal protective equipment:			
General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Wash hands before breaks			
	and at the end of work.		
Breathing equipment:	Not required.

	9
Protection of hands:	The glove material has to be impermeable and resistant to the product/ the substance/
	the preparation.
	Due to missing tests no recommendation to the glove material can be given for the
	product/ the preparation/ the chemical mixture.
	Selection of the glove material on consideration of the penetration times, rates of
	diffusion and the degradation
Material of gloves:	The selection of the suitable gloves does not only depend on the material, but also on
	further marks of quality and varies from manufacturer to manufacturer. As the product
	is a preparation of several substances, the resistance of the glove material can not be
	calculated in advance and has therefore to be checked prior to the application.
Penetration time of glove materia	al: The exact break through time has to be found out by the manufacturer of the
	protective gloves and has to be observed.
Eye protection:	Goggles recommended during refilling.

Section 10: STABILITY AND REACTIVITY

No further relevant information available.

Chemical stability

Reactivity:

Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.

Possibility of hazardous reactions: No dangerous reactions known.

Conditions to avoid: No further relevant information available.

Incompatible materials: No further relevant information available.

Hazardous decomposition products: No dangerous decomposition products known.

Section 11: TOXICOLOGICAL INFORMATION

Information on toxicological effects · Acute toxicity:

General notes:	Water hazard class 1 (Self-assessment): slightly hazardous for water
	Do not allow undiluted product or large quantities of it to reach ground water, water
	course or sewage system.
Results of PBT and vPvB assessme	<u>ent</u>
PBT:	Not applicable.
vPvB:	Not applicable.
Other adverse effects:	No further relevant information available.

Section 13: DISPOSAL CONSIDERATIONS

Waste treatment methods

Recommendation:	Must not be disposed of together with household garbage. Do not allow product to reach sewage system.
Uncleaned packaging Recommendation:	Disposal must be made according to official regulations.
